

ARE EVOLVE TREATMENTS SAFE?

Evolve is a safe and effective treatment that delivers exceptional results. During treatments, the body's temperature is constantly monitored, with real-time updates on the skin's temperature at any time during the procedures.

Evolve's hands-free design and programmable technology make it an ideal social distancing treatment due to the significant reduction in patient-physician face-to-face contact during the procedure. It is designed with a Patient Call Button so you can easily pause your treatment at any time and have clinic staff make adjustments to ensure your comfort.

HOW MANY SESSIONS ARE RECOMMENDED?

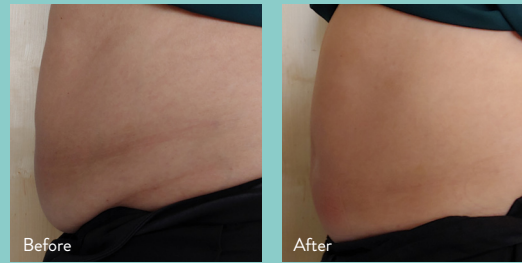

Your practitioner will recommend the optimal number of sessions to be performed based on your personal objectives. Treatment times and frequency will be specifically customized and tailored to address your specific needs, so the end result is a slimmer, toned appearance.

WHAT KIND OF POST PROCEDURE CARE IS RECOMMENDED?

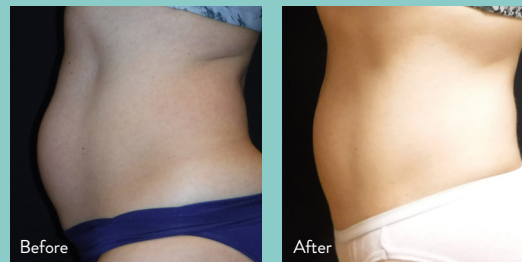

For patients wanting to turn back the hands of time without any further disruptions to their daily activities, Evolve's treatments are ideal - there is no surgery, no anesthesia, no scars, and no downtime. You can return to your regular routine immediately after these total body procedures.

EVOLVE TITE

A non-invasive hands-free procedure specifically designed to simultaneously remodel multiple body areas to improve the appearance of your skin.

WHAT IS EVOLVE TITE?

Evolve Tite delivers an innovative hands-free aesthetic solution to remodel your skin. It is a quick and easy treatment that can be done over lunchtime and is conducted the comfort of a treatment room.

HOW DOES EVOLVE TITE WORK?

Evolve Tite leverages clinically proven bipolar radiofrequency (RF) technology to remodel skin and improve its appearance. The 8 hands-free applicators deliver uniform consistent bulk heating to remodel the skin's subdermal layers.

WHAT CAN I EXPECT DURING THIS TREATMENT?

Most clients find Evolve Tite treatments comfortable. During your procedure you can expect a warming of your skin similar to a hot stone massage. As the radiofrequency penetrates the dermal layers patients typically notice a reduction in the folds of the skin.

EVOLVE TRIM

A non-invasive, hands-free solution to improve the appearance of skin, reduce dimpled skin, and improve elasticity. Ideal for all areas of the body that require fat reduction.

WHAT IS EVOLVE TRIM?

Evolve Trim is an innovative non-invasive, non-surgical solution designed specifically to reduce the unsightly appearance of cellulite. Multiple body areas can be treated simultaneously leaving you with a more natural looking you.

HOW DOES EVOLVE TRIM WORK?

A combination of radiofrequency energy, deep tissue heating, and vacuum design provide maximum results. Radiofrequency energy distributes heat to the skin and underlying fat, causing the tissues to heat. The vacuum and controlled energy pulses then work synergistically to provide natural body shaping results.

WHAT CAN I EXPECT DURING THIS TREATMENT?

Most clients find Evolve Trim treatments comfortable. During your procedure you can expect a warming of your skin and gentle pulling sensation as the radiofrequency and vacuum work together to smooth out unwanted stubborn pockets of fat.

EVOLVE TONE

A non-invasive, hands-free treatment to improve the definition of your natural physique without the downtime or scars associated with invasive surgery. Easily tone your abdomen, hips, and buttocks.

WHAT IS EVOLVE TONE?

Evolve Tone is an innovative non-invasive solution designed specifically to increase muscle strength. It is a non-surgical procedure which will enhance the shape and tone of your body. Multiple body areas can be treated simultaneously leaving you with a more toned and defined physique.

HOW DOES EVOLVE TONE WORK?

Evolve Tone uses electrical muscle stimulation (EMS) to induce involuntary muscle contractions. It is a quick and easy alternative to surgical procedures for achieving sculpted muscles.

WHAT CAN I EXPECT DURING THIS TREATMENT?

Most patients find Evolve Tone treatments comfortable. During your procedure you can expect the applicators to emit direct electrical muscle stimulation that will induce muscle contractions. You will feel your muscles contract similar to what you would experience during a workout.
